# How to Add MD iMap 1.0 Web Services in ArcGIS Desktop
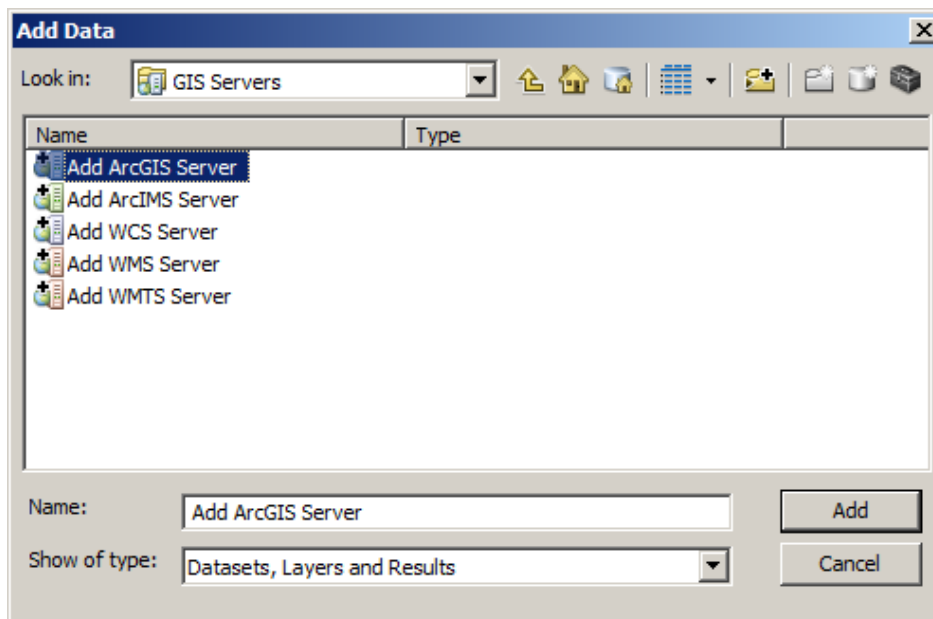

Training

1. Open ArcMap

2. In ArcMap, click the Add Data button and navigate to the data to be added

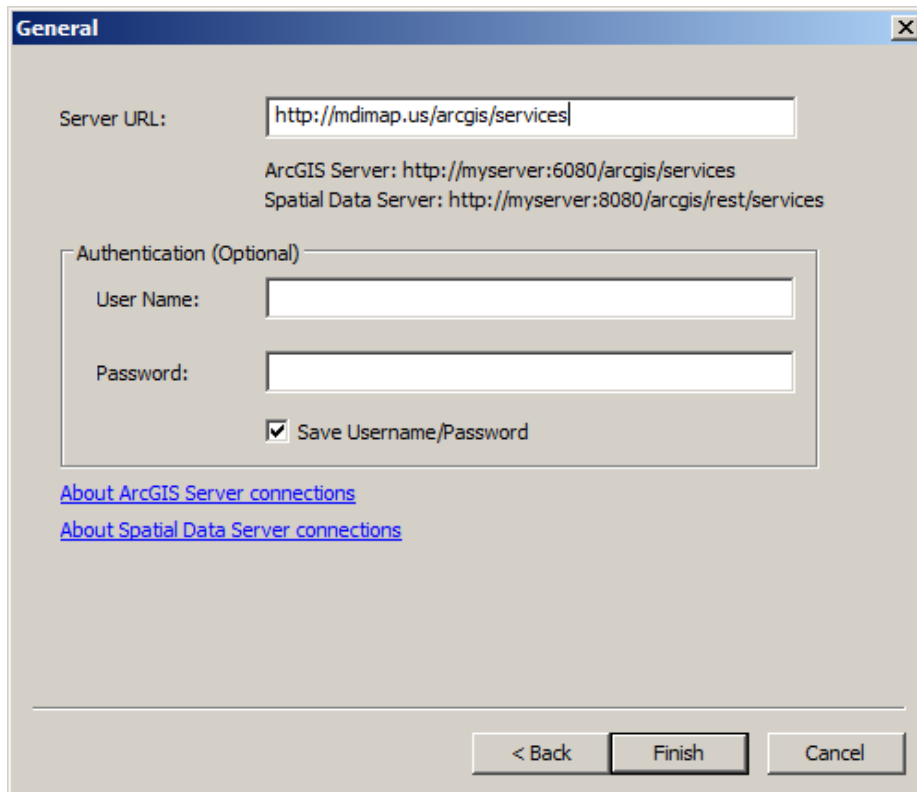

3. From the "Look in:" dropdown list Select GIS Servers

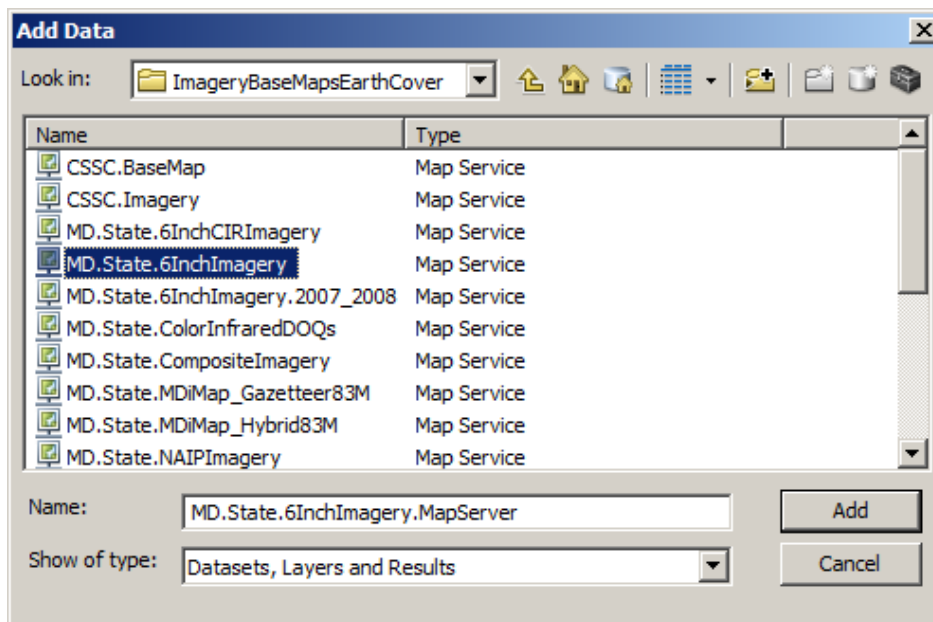

4. Double click Add ArcGIS Server

5. Select Use GIS Services and Click Next

Add ArcGIS Server

This wizard guides you through the process of making a connection to an ArcGIS Server. You can create a connection to use, publish, or administer GIS services.

What would you like to do?

- ○ Use GIS services
- ○ Publish GIS services
- ○ Administer GIS server

< Back   Next >   Cancel

6. Type in the Server URL text box the URL of the remote server and Click Finish

For Example: http://mdimap.us/arcgis/services which is the MD iMap Server URL

General

Server URL: http://mdimap.us/arcgis/services

ArcGIS Server: http://myserver:6080/arcgis/services
Spatial Data Server: http://myserver:8080/arcgis/rest/services

Authentication (Optional)

User Name:

Password:

☑ Save Username/Password

About ArcGIS Server connections
About Spatial Data Server connections

< Back   Finish   Cancel

7. Once connected to this server, navigate to the folder containing the map service of interest, Click the map service to highlight it/select it and Click Add

Note: The connection to the GIS server only needs to be made once. The connection is saved and available for future access of all web services available from this remote server.
